

“Your WHY and Reason for Doing Young Living as a Home Business”

Testimonials from 21 Home Business Owners

www.TheTotalWellnessDoc.com

1. Georgia Watson

I choose to do the business side of Young Living because it provides me the opportunity to help many others with a more natural way of life and better health. I marvel each time I hear how the oils and products have made a difference in someone's life. They work for babies, kids, big people, older people and animals. What a wonderful gift God has given us to share with others. Georgia Watson 10 Year Young Living user 5 years in the business.

2. Katie Anderson

I chose Young Living as a home business because I saw first hand with my family how oils have changed our lives. My daughter is no longer on a daily dose of miralax or prescription allergy meds and after extensive research Young Living would be the only oils I would trust with my daughter. I can't help but share my personal success stories with my friends and family. It is just an added bonus I make a commission!

3. Melissa Stahl Howell

I was really giving this a lot of thought the other day. As a short answer I will say to help my husband retire. He is an amazing man and I'd love to write something up for you.

4. Sage Marie

I have been in a health/fitness/wellness career for 25 years and it was crushing my spirit. I struggled with supervisors who censored the truth about health and wellness in order to keep the ADA or FDA or USDA happy. Being self-employed means that I am able to passionately speak the truth and share the

HOPE that there is wellness without expensive (and often dangerous) pharmaceuticals. Young Living offers me the flexibility to work from home, set my own schedule, and take an entire day every week to serve my community as a volunteer EMT. I can (for the first time in my career) prioritize my own health and well-being! As I advance in rank and take on more of a leadership role, I can also now see that I will be able to provide financial stability for my family. Supporting my team and hearing from them how Young Living has changed their lives is the most rewarding thing I've ever been a part of.

5. Cheryl Marques-Snider

Found what I can do as an RN with full integrity It is my manifested light worker /energy worker position manifested. And I AM Grateful

6. Dr. Mary on Royal Crown Diamond Frances Fuller

Look what Royal Crown Diamond Frances Fuller wrote about why she does Young Living "When I began sharing Young Living essential oils and products, it was because I could see major positive shifts in everyone who used them. These shifts were at the physical, emotional, mental, and spiritual levels and caused me to become passionate about sharing. As my group grew, I realized that developing other leaders was also transformational for the and for me. It truly makes my heart "sing" to be part of the incredible personal growth of so many beautiful beings. On our team, we never "look for leaders" – we GROW them! Frances Fuller

7. Janis Drennen Paz

Because they saved my life and by me sharing I am able to be part of someone else's life being saved.

8. Hilary Schilling

You may share...I used the oils as a customer for 1 year before signing up(I didn't even know I could!) I saw a huge difference in my non-medicated ADHD child and began using them daily on our whole family. I am a fitness instructor for my full time income. I know I cannot do that forever and needed a "retirement plan". This

business has allowed us to move into a bigger house (with my own office!!). I am no longer concerned with my financial future because I know that my business will only continue to grow and I can still do what I love, helping people!!!

9. Beth Tolliver

I fell into YL as a business by accident. I had bought the premium kit just to use on my family back in 2013. I made a few comments about it on my personal FB page out of amazement of how well they worked. Then people started asking me about it.

It took off from there and even though it's growing slowly right now, it is growing. But the real reason I do it? It's hearing someone tell me they've been on 3 blood pressure medicines to no avail, were afraid of being hospitalized, etc. Then they tried one of the oils and they have the lowest blood pressure they've had in 20 years and are now cutting back on meds under their Dr.'s supervision!

It's my husband who had chronic headaches from working at a PC all day (he's a graphic designer and digital sculptor). He would pop 2 ibuprofens per day; sometimes more. Then he started using peppermint oil and doesn't need the pain relievers any more! That's why I'm with Young Living. Seeing illnesses turn around, treating symptoms naturally, watching people get breakthroughs in their health,...there is no price on that for me! I thrive on helping people and YL's products are life changing.

10. Carrie Rodriguez

I started out just ordering oils for my family. I was amazed how the oils really worked! I was a little skeptical prior to using them. Due to my excitement, I started to just share some experiences with family and friends and before I knew it I had people approaching me on the oils.

As I shared my oils with others more incredible things happen to those I allowed to try out my oils! At that point I decided to do Young Living as business. I was not pushing anything on anyone...people were flocking to it and it was helping them! The essential oils fell in line with my holistic upbringing and lifestyle, which was a must.

Another important aspect was that of income potential and noticing that there is no cookie cutter style personality to being successful in this business. I love sharing these amazing oils and seeing individuals health improve!

11. Angela Brooks

As you know Mary, I was not looking for Young Living... It found me. It fell right in line with what I already believed about the use of medication after spending 25 years handing out pills that literally melting people's health after 5-10 years of daily it use.

For once I was able to tell someone to try and test something that worked for them and didn't hurt them. That is an amazing feeling as a nurse...soon to be a retired nurse because of the oils.

13. Mindy J. Kaleta

I came into Young Living because I was taking classes for blogging and had heard about Young Living oils through some of the people in the blogging class. I was at that time probably in the middle of adrenal fatigue but was in denial and having major issues with anxiety and panic attacks. I finally found someone to share with me and started with the \$40 kit, which at that time gave you 5ml bottles of Lavender and Peppermint. I was not actively trying to get people to try it but the few people I have in my downline now, all came to me. Now that I'm trying to make it a biz, I'm finding more blocks and obstacles. I don't think it's so much a set of scripts or way of doing it...as it is a mindset and co-partnering with God to lead you to the people who need them.

14. Andrea Hammer Lahman

I love the time freedom and flexibility. I love that I am getting to homeschool my children because I am creating my own schedule!

15. Mary Anne Zani

Young Living essential oils and nutritional supplements have restored my health from Stage III Colon Cancer. YL has been a God send to me and my family. I share my experience and hope with others who want a better life. My gratitude and appreciation abound and people I meet see my light shine. Spreading the good news about Young Living is more than a business. I am part of a global community.

16. Mary Jo Hoover

My why? I've used oils all my life...I was raised by my grandmother who was born in 1896 and grew up farming...we didn't know what she was using on us were "essential oils" we just called them her concoctions!! But they worked...years later I was using oils I bought at the health food stores...didn't know about Young Living....started using them quite by accident...but WOW I may be a slow learner....but what a difference the right oils can make!!! I love telling everyone about how YL oils have helped me....now my family (all 16 of us) say whenever anyone has an ailment "there's an oil for that!!!"

17. Barbara Dega

I have been sick my whole life...I am not sick anymore...YLEO's keep me in good health and I want others to experience that...the "job.

Job" part is wonderful, flexible, rewarding, nice monthly checks, making new friends, getting to travel, (Utah for convention) and who knows what else God has in store!!!

18. Terri Kuzma

I have been in one Direct Sales company or another for the past 30 years. I was introduced to Young Living at a vendor event nearly 4 years ago while I was representing another company. I loved the products and signed up right away but had NO INTENTION of doing this as a business, as I was very happy with the company I had been with for over 8 years. Well.. as I started using the products and experienced all the benefits I just couldn't contain my excitement for Young Living. Nearly 4 years later I have such a passion for Young Living. These products HELP people... and the business can change people's lives (of course so can the products). There is nothing more rewarding than sharing all the goodness that Young Living has to offer.

19. Annette Filmer Landers

Simply to help others live a healthy, disease free life style they may have never thought possible, especially those who have been chronically ill and are at the "end of their conventional medicine rope"

20. Chuck Bradley

I never like to pay retail. I know the products work so well that my friends will ask me to either get them some or direct them to the source of purchase. I feel that might as well me my referral site and I get a little bit of money for the referral.

21. Heather Santo

I started off using YL oils after I found out that I had tinnitus. Some of the medications I was on could have possibly been causing it to be worse so I went in search of an alternative. I'd used oils in the past, but they were not therapeutic grade and a lot of them smelled like perfume, so I didn't think that they were working the way that they should, and they weren't.

I got my kit and immediately began to notice the relief that I was getting from a combination of not taking the medication and the oils. The oils then became my medication and I was able to get off of my anti-depression medication and my heavy dose sleep medication. My husband was thrilled and always preferred holistic approaches so he was on board using them the day I got my starter kit. After I began telling people about what happened, I couldn't believe how many people wanted me to tell them how, so I decided to start using the oils as a business.

I've always been interested in health, as I've had a weight loss and healthy lifestyle blog over the years as well as my Virtual Assistant business and this just fit right into my business of wanting all people, but especially entrepreneurs, to be healthier and happier because they so easily forget to take care of themselves. Oils have changed my life and I would love to change as many lives as I possibly can."
